

Lesson Plan Template

Name: P. Ekanem	Name of Unit: Addition and Subtraction	Date: 6/22/2011	Grade Level: 2
Objective	Procedures	Materials	Evaluation
<p>Students will use multiple representations for addition (combining of sets) and subtraction (take away, comparison) to solve problems (DOK 1)</p>	<p>The teacher will introduce the vocabulary: same, more, and fewer. The teacher will explain that it is important to be able to compare numbers, groups of numbers, or groups of objects to determine which group is larger or smaller. Also, it is important to determine which group has the same amount, more, or fewer. The overhead projector will be used to display the vocabulary words as well as show the quantities of ham and eggs. Students will complete the activity using one to one correspondence to compare groups. They will use the vocabulary words (same, more, and fewer) to compare groups.</p> <p>Reteach The lesson will be re-taught if class performance is poor. There will be one-on-one help for those students who performed very poorly.</p> <p>Enrichment For remediation, other types of objects will be used including linking cubes as well as making matches. For enrichment, students will solve more, fewer, and same word problems.</p>	<p>Plastic eggs, plates, and ham</p>	<p>Teacher will monitor students as they work. Students' finished work will be graded as they are finished and turned in.</p>
